

Ankara, January 27, 2025

To the Scholarship Committee,

It is my pleasure to write this letter of recommendation for **Mr. Md Abdul Mutalib**, who has been working as a Research and Development Intern in the Science Unit at UniV since September 2024. During his tenure, he has demonstrated exceptional dedication, intellectual curiosity, and a strong commitment to advancing research in the field of computer science and technology. Mr. Mutalib has been an important member of our R&D team with valuable contributions towards ongoing research projects. His primary responsibilities include assisting in managing activities for the R&D Unit, supporting research initiatives, and promoting UniV's mission within the local community. He has also actively participated in the planning of intern activities and developing communication campaigns to enhance our outreach efforts.

One of the notable contributions by Mr. Mutalib is to active involvement in two major projects. He has been working on a review paper that explores the application of machine learning techniques to understand and address autoimmune diseases. His analysis of complex datasets and further proposal of innovative solutions have been commendable. He also contributed to a project focused on assessing flood-induced damages and adaptation challenges in riverine communities in Sylhet, Bangladesh. His work has provided valuable insights into the socio-economic and environmental impacts of natural disasters.

Mr. Mutalib is a very exceptional team member who combines technical skills, dedication, and the ability to work well with others to such an extent that he greatly furthers the developments of our team. He is very attentive to details, approaches challenges in a creative and enthusiastic manner. What sets him apart most is his genuine passion for research and innovation, especially in finding practical solutions to real-world problems. His commitment to making a meaningful impact through his work is really an inspiration and highly valued.

I am confident that Mr. Mutalib's skills, knowledge, and dedication will make him an excellent candidate for the Master's program in Computer Science at Romanian Institution under the Scholarships. His ability to excel in a challenging academic environment and contribute significantly to the field of computer science.

Therefore, I wholeheartedly recommend Mr. Md Abdul Mutalib for the Ministry of Foreign Affairs Scholarships and am confident that he will make significant contributions to your esteemed institution. Please feel free to contact me if you require any further information.
